

Solution Statement

This section deals only with the solution. It may change over the course of the work but for now it needs to give you focus on what you want to do. This section needs to answer who will be doing it, what they will do, how they will do it, where it will happen. The description needs to be in depth. Do discuss benefits or what it is you hope to gain. Just focus on the solution. You will want to cover everyone it will affect and what their part will be.
